AGREEMENT FOR A LONG-TERM METER ON HYDRANT

The Southington Water Department with this agreement will set on a fire hydrant for a customer or their contractor a firebox. The locked firebox will contain a 2" meter, a 2" R.P.D. and have a 2 1/2" fire hose connection outlet. The customer or their contractor must supply all hoses to be used beyond the connection. The location of the hydrant to be used will be determined by the Southington Water Department after consultation with the customer or their contractor. If a customer or their contractor wishes to use a different hydrant, they must come to our office to consult us and set an appointment for a meter relocation. All meters must be removed and returned to the Southington Water Department when temperatures are predicted to fall below 30 degrees Fahrenheit.

Under this agreement, a \$2,500.00 deposit is required. From this deposit, the cost of the water used, labor to set, remove or relocate the meter and test RPD will be deducted. Upon removal and return of the meter and R.P.D., if no damage is found with the equipment, a final cost will be determined. Any difference in the total costs will be billed or refunded as the case may be.

Please note any cancellation of an appointment to set, remove, or relocate the meter must be made by 3:00 pm the day prior or a \$87.00 charge will be incurred.
